CONFIDENTIAL

BENORANDUM FOR THE DIRECTOR OF GENTRAL INTELLIGENCE

SUBJECT: Progress Report of the Executive for Inspection and Security for the Konth of March 1948.

PROGRESS FOR MARCH T.

Status of Security within Ola

DEIG DIST

BE V

1. The investigation of personnel cases continues to present a problem in view of the limited investigative facilities available to the Agency. The limited facilities do not permit full investigative service as was rendered by the F.B.I. prior to their withdrawal of such facilities on I January 1948. As a result there has developed a problem on security clearance for clerical and stenographic personnel. This problem has been somewhat relieved by the establishment of unclassified stemographic and newspaper clipping pools which permit the entrance on duty prior to complete investigation of certain personnel for employment on unclassified projects. This problem is being given continued consideration in order that adequate means will be available to maintain the investigative work load on a current basis.

2. Security violations for the month of March numbered the same (18) as for the month of February. The violations consisted of ten open safes and eight cases of exposed classified material. The security situation, however, is very favorable for the Agency in view of the fact that during the month of March 117 complete inspections were carried out by the Right Duty Officers. Only 18 security violations were developed as a result of these complete inspections which consisted of checking, on a division basis, every safe, desk, and other possible container for the improper storage of classified material.

The various areas of GIA are developing detail operating instructions to implement the Disaster Plan. The instructions are being coordinated and visual charts of evacuation plans for all buildings are to be posted throughout the Agency. In like manner, a coordinated system of alarm signals is to be installed in order that the program may be carried out on a uniform basis.

B. Accomplishments and Activities during Earch 1948

4. Investigations Division

a. Increased liaison efforts have resulted in access to special security files which are now available only to this Agency and the

Federal Bureau of Investigation. This will permit increased coverage in personnel investigations.

- b. The Personal History Statement form has been revised and the final proof copy approved to provide more explicit coverage from the standpoint of investigative requirements.
- o. A survey was conducted to determine those employees of the Agency who have not been fingerprinted since May, 1948 in order to meet CIA requirements under the Federal Loyalty Program.
- d. The mechanics for implementing the program for clearance of contacts for the Contact Branch have been established in comformity with the recently established policy for these two programs.
- e. Status of investigative cases for the month of March is as follows:
